## Trout Season Opens Saturday

The 1933 trout season will get underway this Saturday, April 25. A large turnout is expected if the weather stays a little warmer than the past few weeks. The streams should be near normal as the snow has been gone for some time and there have been no heavy rainfalls yet this spring.

Continued cold weather that has so far plagued the spring of 1933, will cut into the number of trout fishermen provided it holds on during the rest of this week.

This will be the second year in which lake fishing, with the exception of black bass, will open simultaneously with trout season. Last year, it did not appear to have lured too many sportsmen away from the streams and if weather is anywhere near warm yet this spring.

### Restrict East Branch

The East Branch of the AuSable River within the city limits has been restricted for trout fishing except to children of 16 years of age or under.

Under the sponsorship of the Grayling Sportsmen's Club co-operating with the Conservation Department the stream will be restricted from the south boundary of the Fish Hatchery to the Main Street bridge. Signs were donated and will be erected this week for members of the Sportsmen's Club in four different locations along the stream.

is not expected to bother the army of stream fishermen to any extent this season's opening.

Fishing license is needed by any person fishing inland waters, when he has passed his 17th birthday. As before, the resident angler will pay \$1.50 for his regular license and those who fish for trout an extra dollar for the required trout stamp. The wife of the resident fisherman can fish for trout or other species on her husband's permit. Stamp must be obtained in slot provided and the angler must have the license with him while fishing.

## Well Over 100 Attend Banquet

Well over 100 Grayling High Viking athletes, their fathers and guests attended the annual Award Banquet held in the Grayling high gym last Wednesday night.

The affair opened with an invocation by Rev. R. C. Puffer followed by a banquet which featured ham and meat loaf. The meal was served by members of the high school home economic class.

Football coach Arthur Allen served as toastmaster for the program that followed and introduced first on the program, former Viking coach Willard Cornell who spoke briefly.

Following that the second team in basketball was introduced by Coach Allen with basketball mentor Bruce Smith then giving letters to those who had earned them in basketball this past season. Coach Allen then handed out letters and introduced those boys whose play left them just short of a letter this past fall. It was necessary for a boy to have played in half of the season's total games to receive a letter. The awards were to be given out following the main talk of the evening but were advanced in the program due to the speaker being held up at the Straits several hours due to the ferry strike.

By the time the awards were given to the players, head football coach C. V. Money of the Northern Michigan College of Education at Marquette had arrived and was introduced by Coach Allen.

Coach Money brought a very fine theme to those assembled at the banquet pointing out how athletics had always had a direct bearing on history and told of the national past time of various lands and how their national character followed that of their sport. He told the group that 85 percent of all injuries suffered in sports were due to being out of condition. Only 15 percent occur due to accident, he said in urging the boys to not break training and to keep in shape to engage in sports. He also dwelled at some length on studies and that the college that a boy chose should be with the idea of furthering his life's work and not just to play football or basketball.

The program ended with the showing of three full color movies by Fred Bear which he narrated as the movies progressed. The first movie was taken on an elk hunt with bow and arrow in Wyoming last fall, the second was shooting carp in the marshes on Lake Erie and the final reel was taken on a wildcat hunt in northern Michigan.

Among the patients at Mercy Hospital are Treva Engle, Maxine Fenton, Ernest Lowe, Ruby Fox, George Petruha, Alonzo Walker and Don Weaver.

### City To Enforce No Parking Law

Elsewhere in this week's Avalanche is a notice that the city is going to enforce the "No Parking" from 3:00 A. M. to 6 A. M., law on Michigan Avenue in the downtown area. Since in the past, this law for the most part, has only been enforced during the winter months, the police department wishes to announce their intentions in advance. The reason for this decision is to make the job of keeping the streets clean an easier one. It is impossible to do an efficient and thorough cleaning job on the streets with so many parked cars in the way.

Also the no parking on the south side of Cedar Street (US-27) will be enforced. Parking in this area creates a definite traffic hazard.

## "Litterbugs" and "Vandalbugs"

It has remained for the Portland, Oregon chapter of the Izaak Walton League of America to propose a campaign against "litterbugs" and "vandalbugs." Sam Moment of the Portland chapter points out that no picnicking, no hunting, no fishing and no trespassing signs are becoming more frequent and reducing areas for recreation.

He says, "The twin menace to outdoor America has been well known for years but nobody has yet done enough about it. The litterbug, wherever he stops or travels by car, still leaves his trail of eggshells, watermelon rinds, worn-out Kleenex, beer cans, broken pop bottles, or even unmentionables. The vandalbug still aims his rifle anywhere for fun, shoots holes in farmers' milk cans, makes signs unreadable, shatters power line insulators, and spreads wreckage across the country from broken windows to dead prize bulls. Other vandals still set forests on fire with a flip of a cigarette or with a deliberate match. Many families still go wild once they get out-of-doors. They cut down wild flowers and shrubs, and write initials happily on the walls of rest rooms and public grounds. . . . The highways and roadsides have become the wastebaskets of the automobile users."

Mr. Moment suggests that automobile manufacturers, the automobile accessory industry and petroleum companies can well consider selling low-priced waste containers for cars which can be emptied at approved places along highways, in public parks, and at gasoline stations. This is an idea that deserves the support and co-operation of everyone who is interested in preserving the beauties and attractions of the American outdoors.

### PLAN SERIES OF PRESCHOOL CLINICS

Parents of preschool children who will enter kindergarten this fall should be thinking about a complete health checkup for the child now. Clinics are being arranged by the family physicians, parent-teacher associations, school people, and the local health department at the present time.

The new school situation will place increased demands on the child's energy and vitality. He should have the best health and morale when he enters school.

An examination now will reveal any physical defects or handicaps that may be corrected before school starts. If his teeth require attention or if he needs medical care, the summer will allow time for such treatments. If he needs glasses it will allow time for him to become used to them. If he has earaches or running ears immediate treatment may prevent serious hearing loss by carefully carrying out the physician's recommendations.

The child should be given booster shots for diphtheria, tetanus, and smallpox to bolster his immunity to these diseases, and to give time for this immunity to reach its peak.

Let your child play and rest this summer to build himself up to his best health. Good food and rest are extremely important. The child needs citrus fruits, eggs, meat, whole grain cereals, milk and vegetables and plenty of good warm food in summer, as well as in winter. The average preschool child needs about ten hours of sleep at night. He should have definite rest periods during the day. He should be out of doors a good share of the time, but his head and body should be protected from extreme heat of the sun. Both fatigue and chilling should be avoided. He should be protected from unnecessary exposure to disease, but his adjustment to school life will be better if he is encouraged to play with other children.

Talk to your child about his school. Keep him from worry. Show him the safe route to school. Council him to obey the police and safety patrol people and never to run into or play in the street. Do not let him ride vehicles he cannot safely handle. Accidents as well as disease endanger the life and health of the young school child.

District Health Dept. No. 1

## Puts a Good Mark on a Man!

Regardless of where he drives, no man is wholly a stranger to the people about him—if he sits at the wheel of a 1953 Cadillac.

His name may be unknown—and also his occupation—and, likewise, the whereabouts of his home.

But he is not without standing. For his Cadillac marks him as a man of character and substance.

Wherever he may be, let him arrive at the door of a distinguished hotel or restaurant—or let him seek the car of anyone in distinction or information... and he has the courtesy that goes with respect.

And let it be said for Cadillac owners that, almost invariably, they respond in kind.

Indeed, the honor which Cadillac does to its owners is the fruit of the honor they have so long bestowed upon Cadillac. When so many wonderful people favor a particular make of car over such a

long period of time—the car must inevitably become a mark of distinction.

All of this, of course, comes to the owner of a 1953 Cadillac as an extra joy and satisfaction.

It comes in addition to the magnificent performance of Cadillac's 210 h.p. engine and improved Hydra-Matic Drive... the wonderful comfort of Cadillac's new Air Conditioner... the car's soft, easy, relaxing ride... its marvelous balance and handling ease... its long life and dependability... and its truly amazing economy of upkeep and operation.

Put them all together and they spell the grandest satisfaction in all the world of motoring.

Have you seen and driven the 1953 version of the "Car of Cars"?

If not—we should be happy to see you at any time. Why not come in today?

## YOUR MILK...

We often hear it said that this is a man's world.  
But the facts hardly show that. When you are ill,  
a woman is at your bedside. It was a woman that  
was first at the tomb of Jesus. Only a woman  
could be shut in the home with a half dozen young-  
sters, on a rainy day. This calls for patience.  
And when a man comes home with a jag on instead  
of a pay check, this demands the utmost tolerance.  
If it were not for the secret powers a woman has  
in her possession, a man would be a helpless crea-  
ture. Still we men refer to them as the weaker  
sex.

With Polio sweeping the nation it would be a good  
idea to build up the resistance power of the chil-  
dren's bodies with good Crawford County produced  
milk. Sold at Hunter's AuSable Dairy.

director and staff members and  
to provide a meeting place for  
counselor meetings. The new  
building will be of similar con-  
struction and design to the build-  
ings already erected. The staff  
building will be the ninth building  
added to the camp site since its  
purchase by the Michigan Confer-  
ence of Seventh-day Adventists  
several years ago and will elimi-  
nate the staff members living in  
tents during the summer.

Other projects in the United  
States and overseas included in  
the work of Seventh-day Advent-  
ists are 165 hospitals, clinics, dis-  
pensaries, employing 2,632 doc-  
tors and nurses as well as 4,438  
schools and colleges. In many  
areas these are the only medical  
and educational institutions work-  
ing for backward peoples.

Welfare work done here by the  
local church in 1952 is valued at  
\$276 as reported by Mrs. L. W.  
Hyde, the secretary of the local  
Dorcas society.

"Christian helpwork and mis-  
sions at home and abroad have al-  
ways been one of the most power-  
ful forces in building a more pro-  
gressive and free world," stated  
Elder L. W. Hyde. "Millions of  
persons are being helped to help  
themselves." And he added, "This  
is the effective way to build so-  
lidity for the future of civil and  
religious freedom and a free  
world."

## Big travelers, be seated!

THIS is an invitation to you who need  
T and like room when you travel—  
and are wondering where to get it.

This is an invitation to take your ease  
in a sampling of the 1953 Buick SUPER  
Riviera Sedan.

Talk about room (and you will!)—here  
is the roomiest six-passenger sedan  
made in America.

Here you will find headroom, hiproom,  
legroom and kneeroom so generous—  
big people beam.

The tall, the portly—and the in-between  
—they can all spread out and stretch out,  
and really feel unfettered.

But the marvel of this Buick roominess  
is the wondrous ease of handling that  
goes with it.

The world's newest V8 Engine is one  
reason—an engine so compact it permits  
a chassis with short turning radius,  
wider front tread, easier steering, better  
balance.

Twin-Turbine Dynaflo\* with its daz-  
zling new getaway and silky smoothness  
is another. Power Steering\* is still  
another.

And there's an AIRCONDITIONER,† too!

The thing to do, of course, is to visit us  
and try one of these great Buicks for  
room, for ride, for power—and for  
sheer comfort and pleasure. Why not  
make it soon?
